PROFESSIONAL SUMMARY

A Physics graduate with a growing specialization in Cybersecurity and Data Analytics. Skilled in data analysis, problem-solving, statistical analysis, and network security fundamentals, identifying threat activities, as well as Incident Response.

Experienced with Linux environments, network analysis, vulnerability assessment, and Log visualization [SOC/SIEM/SOAR Dashboard]. Proven ability to identify patterns, solve complex problems, contribute to data-driven and secure digital environments, communicate findings to technical and non-technical stakeholders, and strengthening the security posture of Organizations at Large.
Seeking to leverage expertise and growing security/data skills.

TECHNICAL SKILLS

Transferrable skills

- Communication
- Adaptability
- Digital skills
- Critical thinking
- Timekeeping
- Interpersonal skill
- resillience

Cybersecurity

- Vulnerability Assessment
- Network Security Fundamentals
- Security Monitoring
- Email Security Analysis
- Threat Detection
- Incident Investigation
- Digital Forensics Fundamentals
- Log analysis
- Incident Response

Data Analytics

- Data Cleaning
- Statistical Analysis
- Data Visualization
- Exploratory Data Analysis (EDA)
- Report Writing
- Research Data Management

Tools & Technologies

- Kali Linux
- Ubuntu Linux
- Wireshark
- Wazuh
- Microsoft Excel
- R Programming
- Python
- IDS/IPS/EDR tools

EDUCATION

- National youth service corps (NYSC) Ongoing 2026

- Bachelor in physics (B.Sc)
  Federal University of Agriculture Abeokuta 2025
  Relevant coursework: Computational physics | Health/Radiation physics | Nuclear physics

- West Africa examination council (WAEC)
  Lisben College, Abeokuta 2020

CERTIFICATIONS

Introduction to cybersecurity	**Cisco networking academy, February 2026**
Introduction to cybersecurity	Techyjaunt, March 2026

Assets threats and vulnerabilities	Google professional certificate, April 2026
Data analysis Training: excel, SPSS, R Programming	Dornuel Data School, May 2026
Google Cyber Security	Google professional certificate, July 2026
CyberOps Associate	**Cisco networking academy, July 2026**

EXPERIENCE

INTERN STUDENT

Bright Technologies, an internet service provider. May – October, 2024

- Performed Network troubleshooting and fault diagnosis
- Router/switch configuration and maintenance
- Monitoring network performance and uptime
- Assisted with Customer premise equipment(CPE) setup and configuration
- Fiber optics internet installations
- Providing first level technical support to customers

LIVINGSTONE COLLEGE OF ART AND SCIENCES

Place of Primary Assignment (Ongoing), January – October, 2026.

Key responsibilities:

- Assisted students during laboratory practical sessions in Physics and related scientific experiments.
- Supported the setup, calibration, and maintenance of laboratory equipment and instruments.
- Guided students in data collection, observation, and interpretation of experimental results.
- Maintained accurate records of practical activities and laboratory resources.
- Assisted lecturers in preparing laboratory materials and ensuring compliance with safety procedures.

Skills demonstrated:

- Data Collection and Analysis
- Technical Documentation
- Laboratory Operations
- Problem Solving
- Communication and Teamwork

CYBERSECURITY INTERN

CyBlack SOC Academy April – August 2026

Key Responsibilities:

- Monitored and investigated security alerts within simulated SOC environments.
- Analyzed logs and network traffic to identify suspicious activities and potential security incidents.
- Conducted vulnerability assessments and documented remediation recommendations.
- Utilized tools such as Wireshark, Nmap, Kali Linux, and SIEM platforms for security analysis.
- Participated in threat hunting, incident response simulations, and cybersecurity laboratory exercises.
- Produced incident reports and technical documentation based on investigative findings.

Skills demonstrated:

- Security Monitoring
- Log Analysis
- Incident Investigation
- Vulnerability Assessment
- Threat Detection
- Linux Administration
- Network Security
- Incident Reporting

PROJECTS

1. PHISHING EMAIL ANALYSIS
   TOOLS USED:
   MXToolBox | ipinfo.io | WHOIS

   Brief description:
   A 3-email phishing campaign was detected targeting the Finance department. All three emails were sent from the same source IP (185.234.219.101) using spoofed domains to impersonate the CFO and a vendor.

   Key Findings:

   Email 1: CFO impersonation requesting $47,000 wire transfer
   Email 2: Vendor follow-up with fake invoice and banking change
   Email 3: CFO escalation with isolation tactics ("DO NOT call me")

2. THREAT INTELLIGENCE
   TOOLS USED:
   Docker | Virustotal | MISP

Brief Description:
This investigation was structured around three core objectives, each designed to point to a distinct phase of a real-world threat intelligence engagement.

- IOC collection
- IOC analysis & infrastructure assessment
- Threat actor profiling

3. VULNERABILITY ASSESSMENT

TOOLS USED:
Nesssus essential | anisble | Nginx | nessus SMTP server

Brief description:
This report presents the findings of a vulnerability assessment conducted on the internal infrastructure of CyberTech Solutions. The assessment was carried out using Nessus Essentials and covered two scan types: a credentialed SSH scan targeting the Linux server, and a web application scan targeting the Nginx web server running on the same host. Patch management was subsequently performed using Ansible to remediate the most critical findings.

The assessment identified a total of 67 vulnerabilities across the credentialed scan and 11 vulnerabilities from the web application scan. The majority of findings over 80% across scans were classified as informational, representing system disclosures rather than directly exploitable weaknesses. However, several high and medium severity vulnerabilities were identified that pose real risk to the organisation if left unaddressed.

PERSONAL DATA

Date of Birth	26th January
Sex	Male
Nationality	Nigerian
State of Origin	Ogun
LGA	Odeda
Marital	Christianity
